* Must be used with the full size, stainless steel Liberty Suppressors Fixed Barrel Adapter.

Barrel Restrictions:

- .223, 7.62 x 39, 6.8 SPC size family of cartridges are now rated for 11.5" barrels.
- 300 Blackout is now rated down to 5" barrels as long as the twist rate of the barrel will stabilize the bullet in flight.
- .308 families of cartridges, such as 243 Win, 270 Win, 30-06, etc. are rated for 18" or longer barrels.
- 300 Win Mag family of cartridges such as 7mm REM MAG, 338 Win Mag, 300 WSM, etc. are rated for 22" or longer barrels.

Note: All rifle calibers with chamber pressures exceeding 45,000PSI that are on the caliber list, are restricted to 16" barrels or longer. (6.8SPC, 5.56 NATO, and the like FROM THE CALIBER LIST ONLY)

Note 2: It has been found that Monarch brand 124r JHP will separate in the suppressor and can generate baffle strikes due to instability in the rounds. Please refrain from using this ammunition in your Mystic X suppressors or any other Liberty can at this time. Thank you.
