Specification Sheet for Titanium Center Fire Rifle Suppressors

Model name: Victory

Caliber: 7.62 NATO

Weight: Approximately 15.7 ounces

Length / Diameter: 10"

Material: Titanium Suppressor with a Stainless Blast

Baffle Attachment: 5/8-24 Thread mounted

Description: The Victory suppressor is the result of ongoing research and development here at Liberty Suppressors. This suppressor uses the innovative square bore technology that we pioneered in our Pandora line of suppressors. The suppressor mounts via a traditional thread mounting scheme for better accuracy and repeatability. This suppressor produces world class suppression in excess of 33db and is lighter weight than most suppressors in the same class at a mere 16 ounces. The suppressor comes standard with a moly resin finish and a mirage shield. Lighter weight equates to less POI shift in your unsuppressed to suppressed zeros on your long range weapon platform. Get yours today!

Model name: Victory MAG

Caliber: 300 WIN MAG

Weight: Approximately 18.8 ounces

Length / Diameter: 11"

Material: Titanium Suppressor with a Stainless Blast

Baffle Attachment: 5/8-24 Thread mounted

Description: The Victory MAG suppressor is the result of ongoing research and development here at Liberty Suppressors. This suppressor uses the innovative square bore technology that we pioneered in our Pandora line of suppressors and has been updated to withstand the punishing forces associated with the 300 WIN MAG cartridge.. The suppressor mounts via a traditional thread mounting scheme for better accuracy and repeatability. This suppressor produces world class suppression in excess of 33db and is lighter weight than most suppressors in the same class at a mere 19 ounces. The suppressor comes standard with a black moly resin finish and a mirage cover. Lighter weight equates to less POI shift in your unsuppressed to suppressed zeros on your long range weapon platform.
